

# Ochre Pollution as an Ecological Problem

in the Aquatic Environment

— Solution Attempts from Denmark —

Verockerung als gewässerökologisches Problem

— Lösungsansätze aus Dänemark —

Hilke Prange

Dissertation work, october 2005 (Diplomarbeit)

University of Applied Sciences

Hochschule Bremen

Department 7 (Fachbereich 7)

International Degree Course Industrial and Environmental Biology  
(Internationaler Studiengang für Technische und Angewandte Biologie, ISTAB)

Tutors (Referenten):

Prof Dr Heiko Brunken

Dr Gerd Weber

## Table of contents

<b>1. Introduction .....</b>	<b>1</b>
1.1 Background and motivation of this dissertation.....	1
1.2 Investigation areas.....	2
1.3 Landscape Development .....	4
1.4 Influence of ochre pollution on biological quality parameters of the WFD .....	4
1.5 Natural abundance of iron within terrestrial and aquatic environments .....	6
1.6 Chemical iron oxidation.....	7
1.6.1 A redox-reaction determines the relation between ferrous and ferric iron.....	7
1.6.2 Chemical iron oxidation and its interaction with chemical parameters.....	8
1.7 Biochemical iron oxidation .....	10
1.7.1 Iron oxidation at springs.....	10
1.7.2 Oxidation of pyrite within the soil .....	10
1.7.3 Sediments and resuspension within standing waters.....	12
1.8 Different reasons of ochre pollution.....	13
1.8.1 Anthropogenic reasons for ochre pollution.....	13
1.8.2 Allochthone and autochthone ochre pollution .....	14
1.9 Aim of investigations .....	15
<b>2. Materials and Methods .....</b>	<b>16</b>
2.1 General approach.....	16
2.2 Detailed investigations of three ochre lakes in the SJA .....	16
2.2.1 Structure of the investigation of ochre lakes .....	16
2.2.2 Collection of additional background information .....	17
2.2.3 Investigation of iron concentrations and influence of discharge.....	17
2.2.4 Investigation of iron loads.....	18
2.2.5 Investigation of abundance and distribution of vegetation and turbidity.....	18
2.2.6 Investigation of deposition, retention time and surface-volume-ratio .....	18
2.2.7 Determine discharge within the vegetation channel at Hvirlå Ochre Lake.....	20
2.2.8 Data investigation of oxygen, pH, alkalinity and temperature.....	20
2.2.9 Material for the investigations within the field .....	21
<b>3. Results.....</b>	<b>22</b>
3.1 Abatement measures and strategies from Denmark.....	22

3.1.1	Identification of ochre potential areas and threshold values .....	22
3.1.2	Approval of drainage projects and stream targets .....	23
3.1.3	Where to start – the priority list of the Sønderjyllands Amt .....	25
3.1.4	Review of ochre projects .....	26
3.2	Parameters that influence instalment and maintenance of ochre lakes .....	26
3.2.1	Definition of the term “ochre lake” .....	26
3.2.2	Volume and retention time .....	26
3.2.3	Position within the stream system .....	27
3.2.4	Maintenance and disposal .....	27
3.2.5	Vegetation within the ochre lakes .....	28
3.2.6	Attempts to improve cleaning efficiency .....	29
3.3	Examples for different types of lakes .....	30
3.4	Definition of efficiency .....	32
3.5	Detailed investigations of three ochre lakes in the SJA .....	33
3.5.1	Hvirlå Ochre Lake .....	33
3.5.2	Løgumkloster Bæk Ochre Lake (dam across a valley) .....	42
3.5.3	Landeby Bæk Ochre Lake .....	49
3.6	Further possibilities to combat ochre pollution .....	57
3.6.1	Winter Ochre Lakes .....	57
3.6.2	Combat the origin of ochre pollution – raise water tables .....	58
3.6.3	Ochre abatement projects within clearly demarked valleys .....	58
3.6.4	Ochre abatement measures within flat terrain .....	61
3.6.5	Alteration of maintenance .....	61
<b>4.</b>	<b>Discussion .....</b>	<b>67</b>
4.1	Know how and experience are already available .....	67
4.2	Investigation of the cleaning efficiency of three ochre lakes in the SJA .....	67
4.2.1	Impact of the catchments area on amounts of iron that reach the ochre lake.....	67
4.2.2	Reasons for the different cleaning efficiencies in the investigated ochre lakes.....	68
4.2.3	Consequence for the aquatic ecosystem downstream the ochre lakes .....	72
4.3	Combat reasons rather than symptoms – an outlook.....	74
4.3.1	Ochre lakes in comparison to other measures .....	74
4.3.2	Application of already abundant know how?.....	75
<b>5.</b>	<b>Literature .....</b>	<b>77</b>
